Paris Action Climat Contact

 Cédric Nicard

“ For more than 50 years, the history of PERIAL has been in keeping with the real estate and savings markets. These markets are today facing many upheavals and major challenges, including climate change.

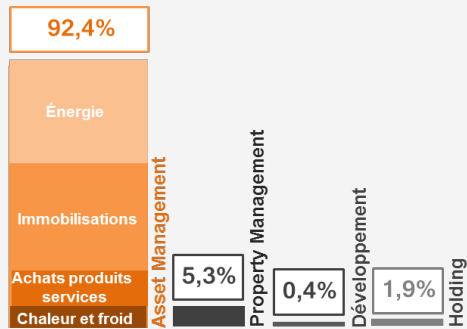

PERIAL is a creator of sustainable performances. Beyond ensuring the financial and real estate performances demanded by our investor clients, the PERIAL teams work every day on another performance, the environmental performance of managed buildings, whose objective is to reduce the impact of their carbon emissions on the climate. Our actions are at the heart of a shared belief: sustainable performance is the only thing that matters.

This is the meaning of the approach initiated by our group: an ambitious Climate Plan, going beyond the regulations, and aligning itself with the best practices of the market. ”
